

Welcome to the Campaign Opposing Unflued Gas Heaters (COUGH). We are committed to the removal of unflued gas heating in NSW public school classrooms and facilities.

Every day that you send your child  
into a classroom with an unflued gas  
heater operating...

... you are poisoning them.

### **Listen:**

COUGH spokeswoman Jo Keown talks about why the campaign is critical to the health of children and staff in schools 28/2/12 (interview starts around two thirds of the way along):

### **Watch:**

Both unflued and flued heaters carry risks. This video talks about why it's critical to service all gas heaters properly and features a heartbreaking interview with parents who lost children to carbon monoxide poisoning in Victoria:
