

Are you someone who has benefited from the replacement program?

Tell us your story so we can share it and let others know how important it is to you that unflued gas heaters were replaced at your school. Contact: [info@cough.org.au](mailto:info@cough.org.au)

*"Knowing my asthmatic son was not going to be exposed to dangerous emissions in the classroom has meant I am confident that when I send my child to school the environment will be supporting him and his education. It is impossible to measure the peace of mind this brings a parent."* Suzanne Roth

*"What a difference to the internal air quality our new heaters have made - no longer do we walk in to school on a cold morning to an environment reeking of poisonous fumes! It's such a relief knowing that our classrooms are free of carbon monoxide, formaldehyde and other toxic exhausts. What's really remarkable is how long our kids had to put up with it, six hours a day, and for months on end in our long cold season. I feel for those schools who are still fighting for a safe environment for their staff and students."* Simone Ford

**Please** visit the Asthma Foundation website and complete a two-click survey on the replacement of unflued gas heaters in public schools. [Click here](#) to see new videos and information and complete the survey so results can be presented to the government!
